Who We Are

Bright Coffee Shop is an intimate haven where quality coffee meets a welcoming atmosphere.

We craft café experiences that feel both elegant and personal — a cozy retreat for every customer who steps through our doors.

With three locations across New York City, we serve over 149,000 transactions in our first 6 months.

Our Philosophy

- ✦ Luxury at affordable prices
- ✦ Quality you can taste
- ✦ Fresh, locally sourced ingredients
- ✦ Innovative flavours, classic comforts
- ✦ Rewarding loyalty
- ✦ Crafted with passion

NYC – 3 boroughs

Total Revenue by Store Location

Top Performer

Hell's Kitchen

R236,511.17

Highest-traffic location
attracting commuters,
students & tourists.

Lowest Revenue

Lower Manhattan

R230,057.25

High competition from
nearby coffee shops
makes it harder to stand out.

Monthly Revenue Trend — Jan to Jun 2023

↓ Feb dip

↑ May-Jun surge

Best-Selling Product Categories

Key Insight

Coffee dominates with 58,416 units sold.

Tea is a strong second at 45,449.

Affordable categories drive the highest volume — this aligns with the brand's 'luxury at accessible prices' philosophy.

Price vs Sales Volume: The Affordability Effect

Expensive + Low Sales

Affordable + High Sales

Worst Sellers

Packaged Chocolate

R13.33 max • 487 units

Branded Products

R28.00 max • 747 units

Loose Tea

Mid-range • 1,210 units

Revenue by Time of Day

Peak Period

Mid Morning 9am – 12pm

R220,148

Customers grabbing coffee on their way to work or settling in for meetings.

Staff up during this window to reduce wait times.

Revenue by Day of the Week

Monday — Highest — Commuters kick-start the week with coffee

Saturday — Lowest — Weekend routines shift away from coffee shops

Transaction Volume by Month

What the data tells us

- ◆ June is the busiest month (24%) as winter drives hot drink demand.
- ◆ Jan & Feb together account for only 23% — the summer heat suppresses coffee purchases.
- ◆ April–June (Q2) = 63% of all transactions, suggesting a strong seasonal winter skew.
- ◆ Opportunity: introduce cold drinks in summer to capture Jan–Feb revenue.

Monthly Revenue by Store Location

All three locations follow the same seasonal upward trend. Lower Manhattan consistently lags — targeted promotions could close the gap.

Key Insights

01

Affordability drives volume

Cheap products (Coffee, Tea) dominate sales. Price is the #1 purchase driver for repeat customers.

02

Mid-morning is the golden hour

9am–12pm generates R220K — more than any other time window. Staffing and promotions should peak here.

03

Summer demand drops sharply

Jan & Feb are the weakest months. Cold drink offerings can convert this into a revenue opportunity.

04

Expensive products are invisible

Branded goods and coffee beans sell poorly despite high margins. They need targeted promotion.

05

Hell's Kitchen leads consistently

Its high-traffic downtown location outperforms year-round. The model should inform expansion plans.

06

Growth is strongly seasonal

Apr–Jun = 63% of transactions. Seasonal promotions & events in Q1 can smooth the revenue curve.

Strategic Recommendations

R1

Introduce summer cold drinks

Ice coffees, iced teas, and coffee-flavoured cold drinks are trending. Launch a seasonal menu in Jan–Feb to capture lost revenue.

R3

Boost Lower Manhattan performance

Run location-specific loyalty promotions and weekday morning deals to differentiate from nearby competitors.

R5

Host weekend events & workshops

Latte art classes, coffee tastings, and food pairings attract new customer segments and boost Saturday revenue.

R2

Promote expensive products

Partner with content creators for social media campaigns targeting Branded goods and Coffee Beans. Use in-store sampling during peak hours.

R4

Launch a loyalty programme

"Buy 5, get 1 free" or a points system rewards repeat customers and increases visit frequency — especially on low-traffic Saturdays.

R6

Expand the food menu

Add trendy light meals — avocado toast, salads, vegan and gluten-free options — to increase basket size and mid-afternoon footfall.

In Conclusion

This analysis of Bright Coffee Shop's first half of 2023 has identified clear seasonal patterns, product performance gaps, and untapped revenue opportunities.

By acting on these insights — from seasonal cold drinks to loyalty programmes and targeted promotions — Bright Coffee Shop can build on its strong foundation and grow revenue meaningfully in the second half of 2023 and beyond.

Thank you for your time.
